DETAILED ACTION

Claims 1-11 are presented in the instant application according to the Applicant's filing on 11/14/2003.

Claim Objections

1. Claims 5 and 8 are objected to because of the following informalities:

Claim 5, line 2, change "phase error calculator" to --phase error operator--; since this appears to be a typographical error and antecedent basis for "phase error operator" has already been recited in claim 1.

Claim 8, line 3, change "third" to --first--;

Line 6, change "fourth" to --second--.

Since these appear to be a typographical errors and also there are no third and fourth phase error operators shown in the drawings.

Appropriate correction is required.

Allowable Subject Matter

2. Claims 1-11 would be allowable if claims 5 and 8 are rewritten or amended to overcome the objections set forth in this office action.

3. The following is an examiner's statement of reasons for allowance:

The closest prior art fails to disclose or fairly suggest a frequency control apparatus including an adder for summing first and second phase errors; a first multiplier for multiplying an output of the adder with a first coefficient; and an integrator for integrating results of the first multiplier to generate a control signal, in combination with the remaining claimed limitations, as called for in independent claim 1.

Art Unit: 2816

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Remarks

4. The Examiner contacted the Applicant's representative, Mr. Andrew Telesz, on 04/07/2005 to resolve the objections stated in the current office action; however, Mr. Andrew requested to have an office action sent out as an alternative.

Citation of Relevant Prior Art

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Prior art Chen et al. (U.S. Patent No. 6,665,355) discloses a method and apparatus for carrier acquisition of vestigial sideband signal.

Prior art Janesh et al. (U.S. Patent No. 6,097,768) discloses a phase detector for carrier recovery in a DQPSK receiver.

Inquiry

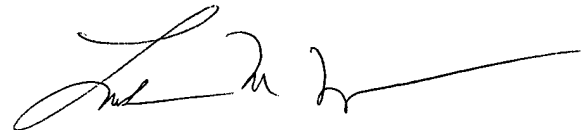

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Linh M. Nguyen whose telephone number is (571) 272-1749. The examiner can normally be reached on Alternate Mon, Tuesday - Friday from 7:00 to 4:30.
